

ADVANTAGE AUTOMOTIVE FILMS

**THE FILM
EVERYONE IS
TALKING ABOUT...**

Why Advantage Automotive Films?

Advantage Automotive Films are manufactured unlike any other film. Made 100% in the USA, Advantage Automotive Films are designed to the specifications of installers. Advantage Automotive Films Heat-Shape very easily, therefore the film is less likely to be compromised during the installation process. Once installed, you will see first hand that Advantage Automotive Films are the clearest films available. Advantage Automotive Films are made in a wide variety of constructions, shades and visible light transmissions. Both automobile owners and installers agree, Advantage Automotive Films look great and perform even better.

What does No-Color-Change mean?

No-Color-Change means that over the life of the film the color will remain the same. Advantage Automotive Films are backed by a Manufacturer's Nationwide Lifetime Warranty insuring that no matter where you take your automobile – you're covered!

What is VMS?

The *VanGuard-Mounting-System* is the backbone of Advantage Automotive Films. VMS has the highest temperature rating of any mounting adhesive available. Even in the harshest climate, the *VanGuard-Mounting-System* will firmly bond the film to the surface of the glass while remaining crystal clear. VMS is 100% made in the USA and only available in the Advantage Automotive Films product lineup.

***A visible difference...
a distinct ADVANTAGE!
Choose the Advantage
Automotive Film that's
right for you today!***
